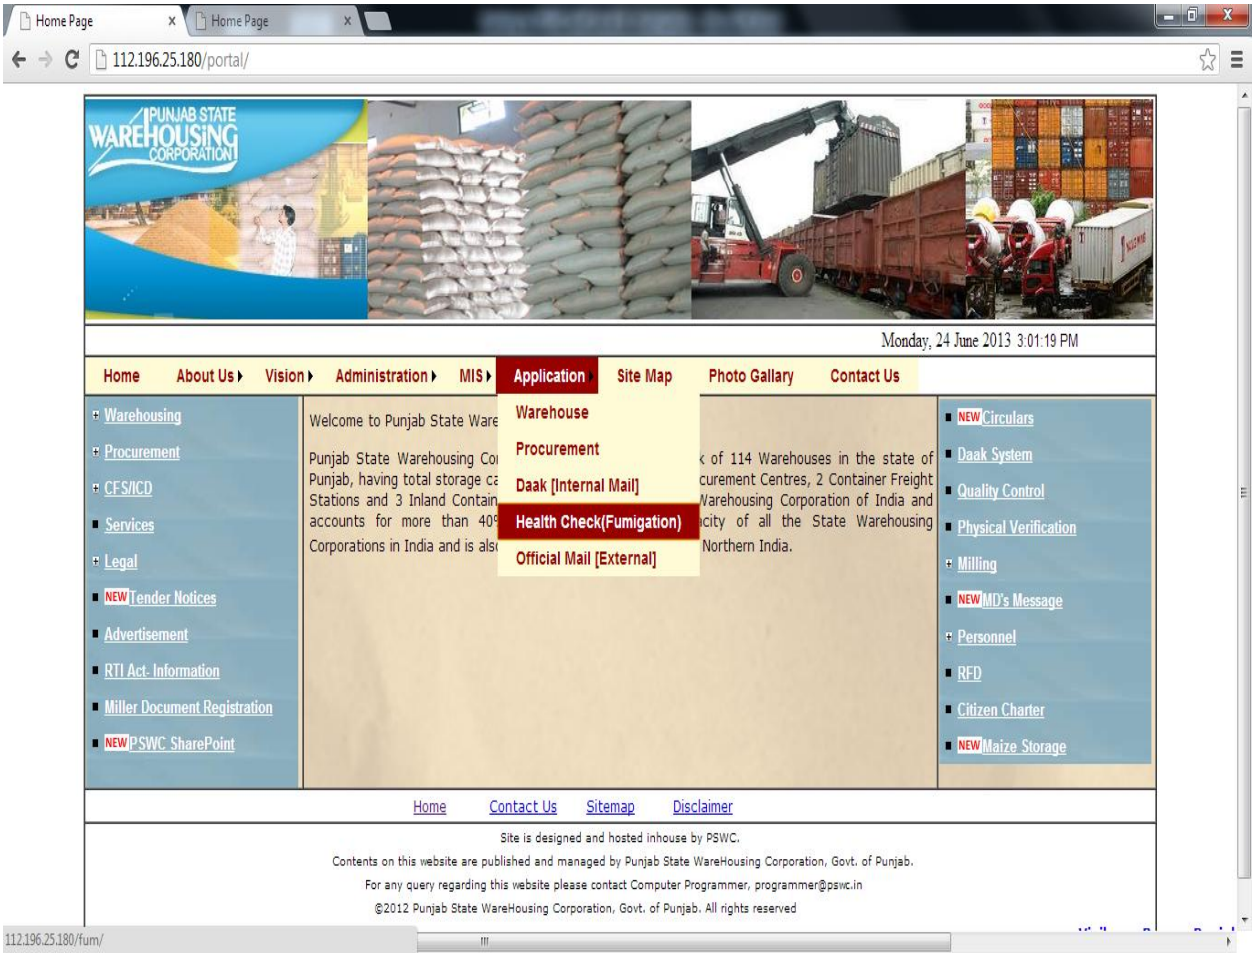
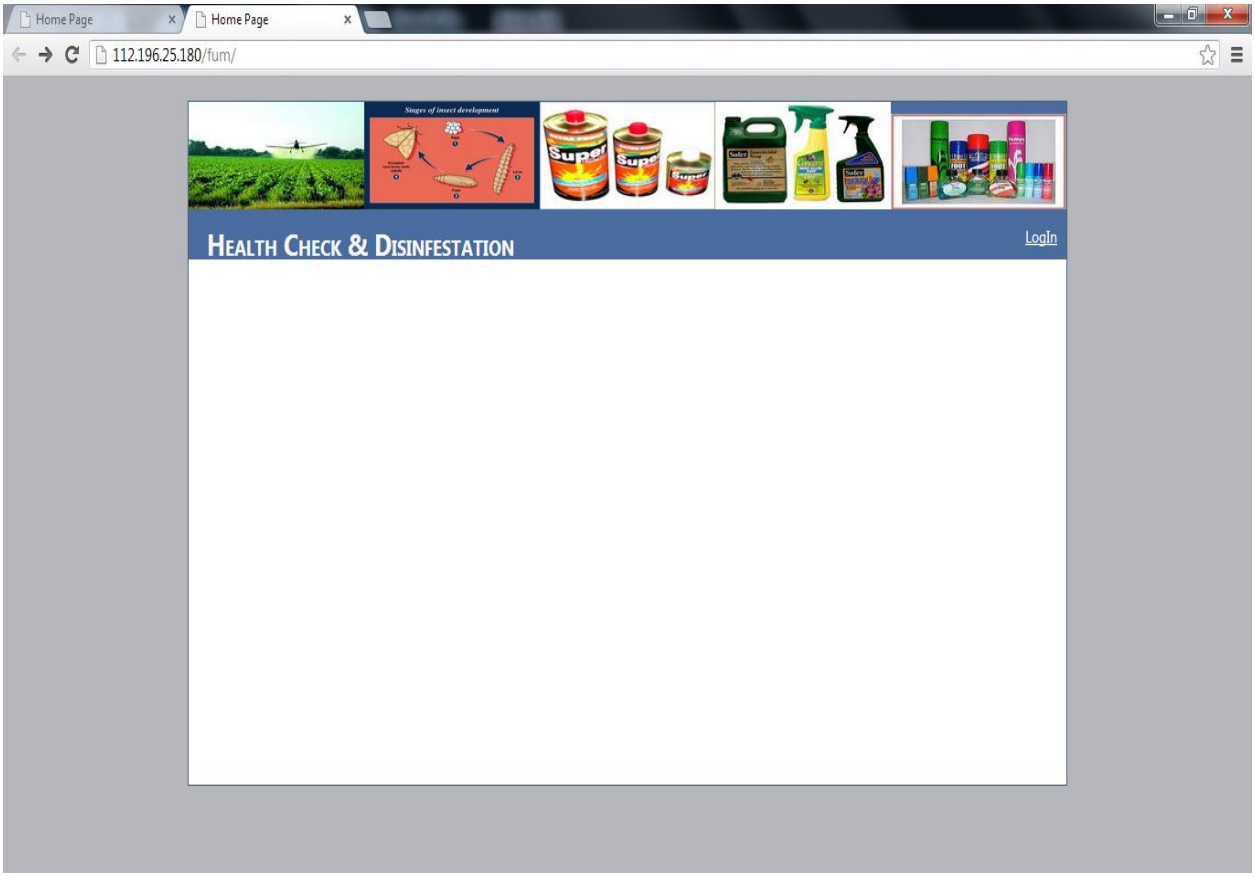
Let us start with the Module of **Health Check (Fumigation).** For using this, we need to click on the application as depicted below.



Bring mouse cursor over “Application” option and sub-options such as warehouse, Procurement, Daak (Internal Mail), Health Check (Fumigation) & Official Mail (external) shall appear. Click on “Health Check (Fumigation)” option.

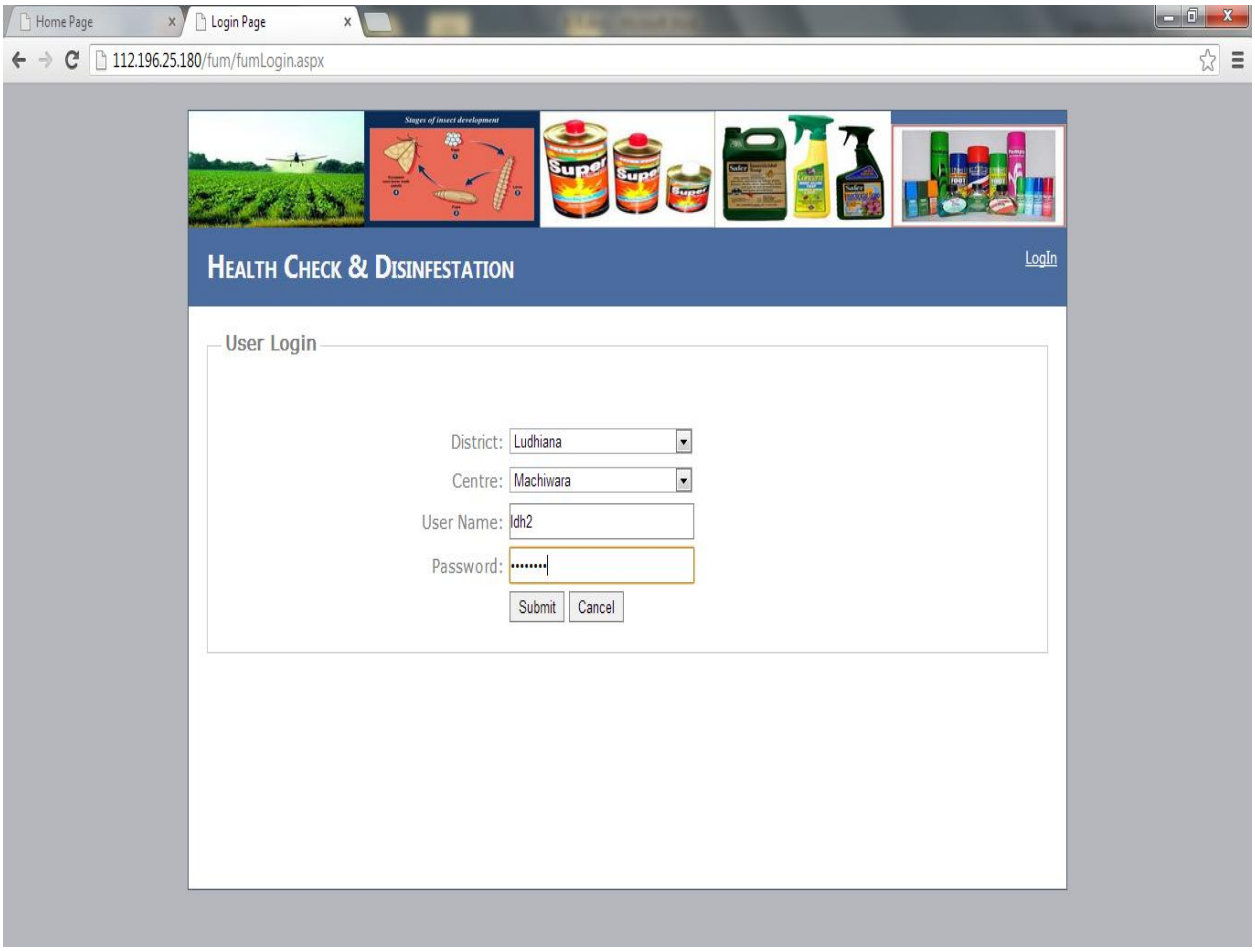
Health Check & Disinfection Screen

The following screen appears after applying actions, discussed in the previous screen. Now, the user needs to login the page with username and password, already allotted by the Head Office. The Login button is there on the right side of the menu bar. Click on “Log In” button to proceed further.



Login Screen

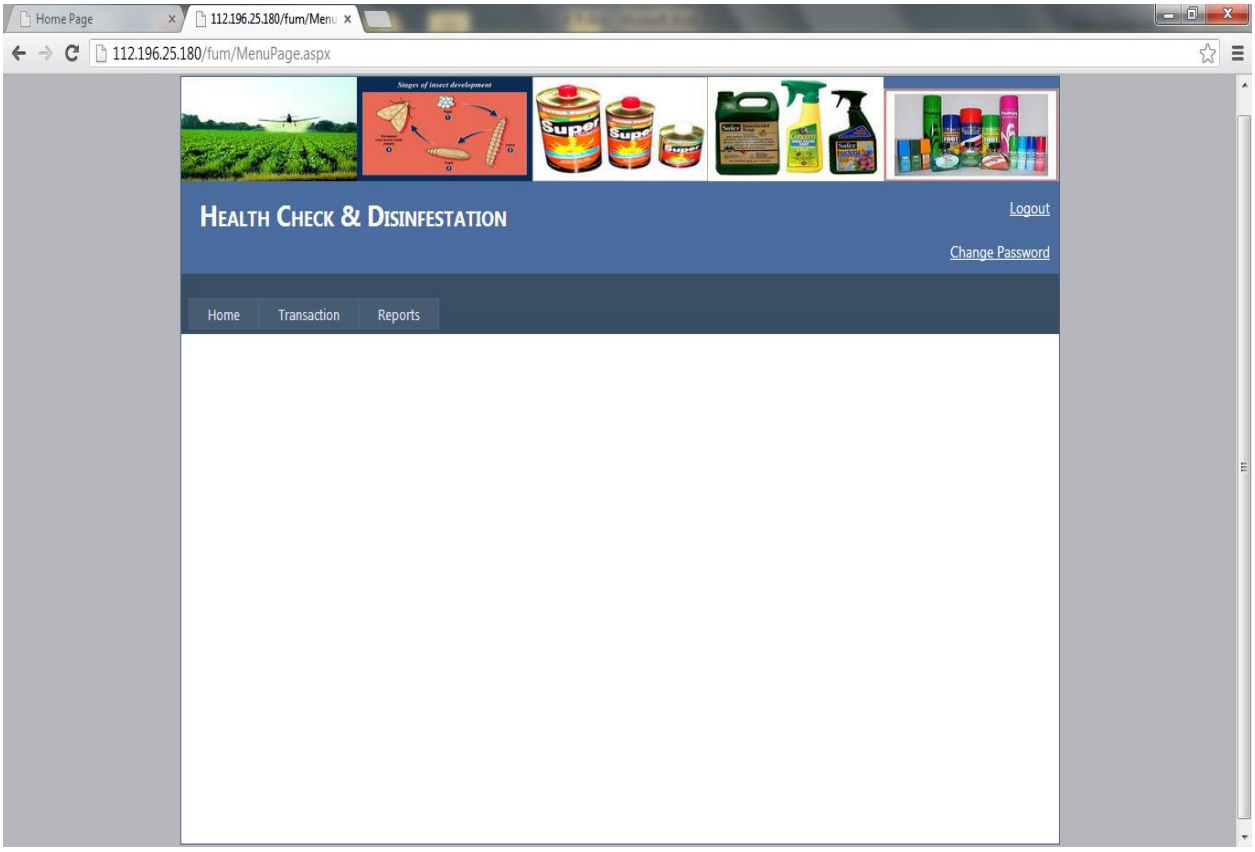
The following screen appears after clicking on the log in button. The user has to select the District and Centre from the dropdown list and the user has to insert Username & Password already allotted by the Head Office and click on the submit button to proceed further.



Home Screen

The following screen appears after log in. This is the main screen in which there are 3 fields available on the menu bar and that are:-

1. Home
2. Transaction
3. Reports

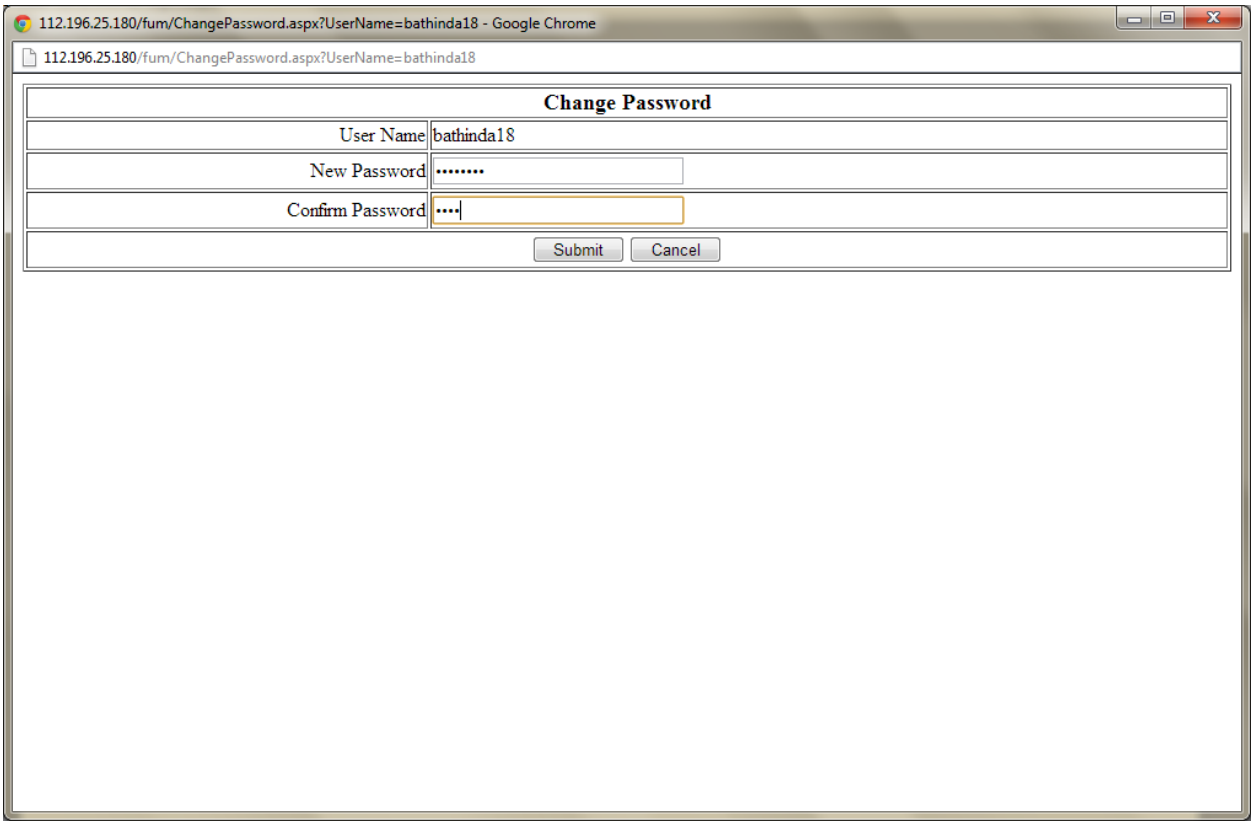


Logout

One more button is there on the top right corner of the page which is “Logout” button. If the user doesn’t want to perform any task in the page then he can click on the logout button and the page will be redirected to “**Home**” page. The “**Logout**” button is available on the every page after “**login**”.

Change Password

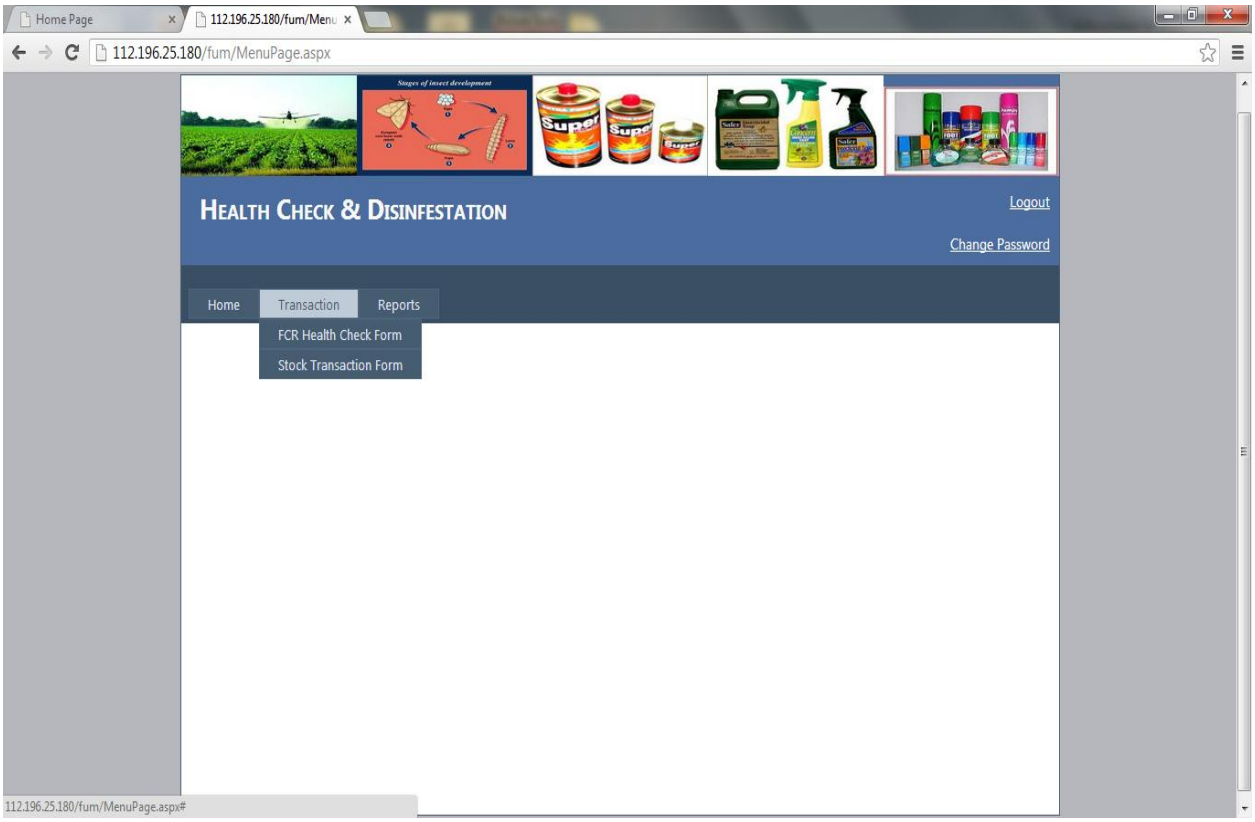
The user can change its password by clicking on the "**Change Password**" link which is there on the top right corner of the page. The user cannot change its **Username**. The following screen will appear:



Transaction Menu

Bring Mouse courser on the “Transaction”, it will display the 2 sub fields which are:-

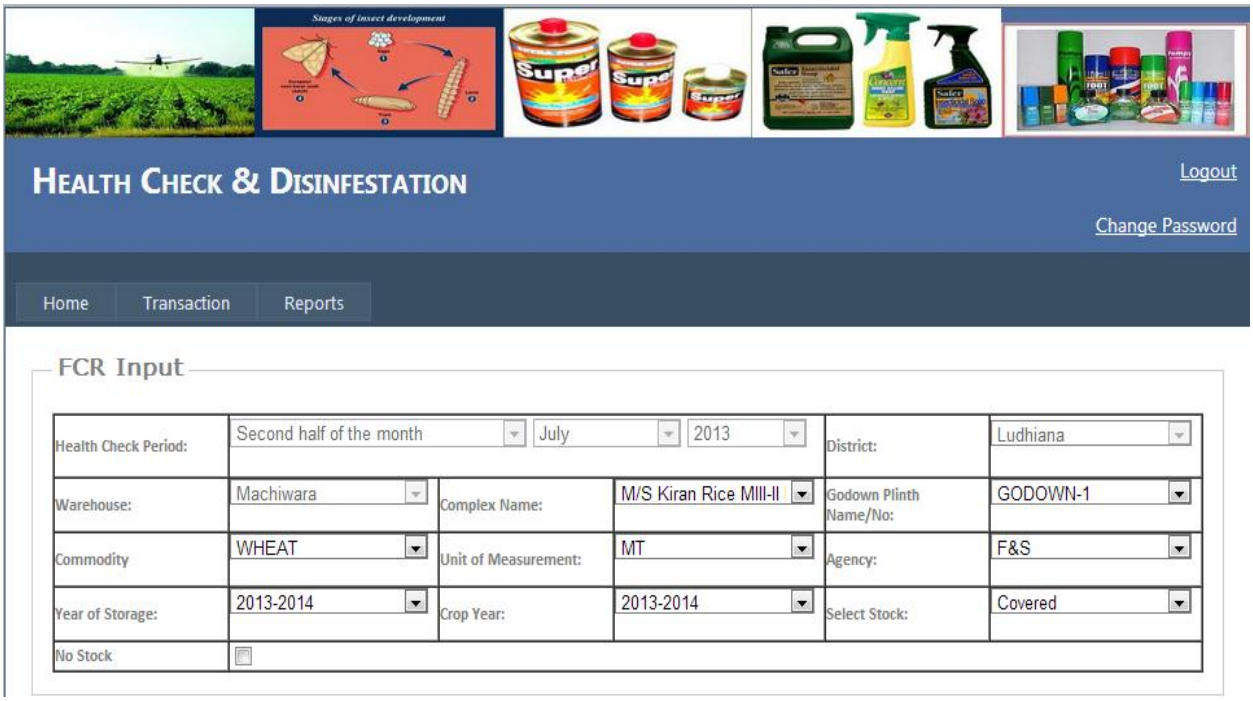
1. FCR Health Check Form
2. Stock Transaction Form



FCR Health Check Form

After bringing mouse on the Transaction, as described above click on the “FCR Health Check Form” and the form will open shown below which contains the different modules that are:

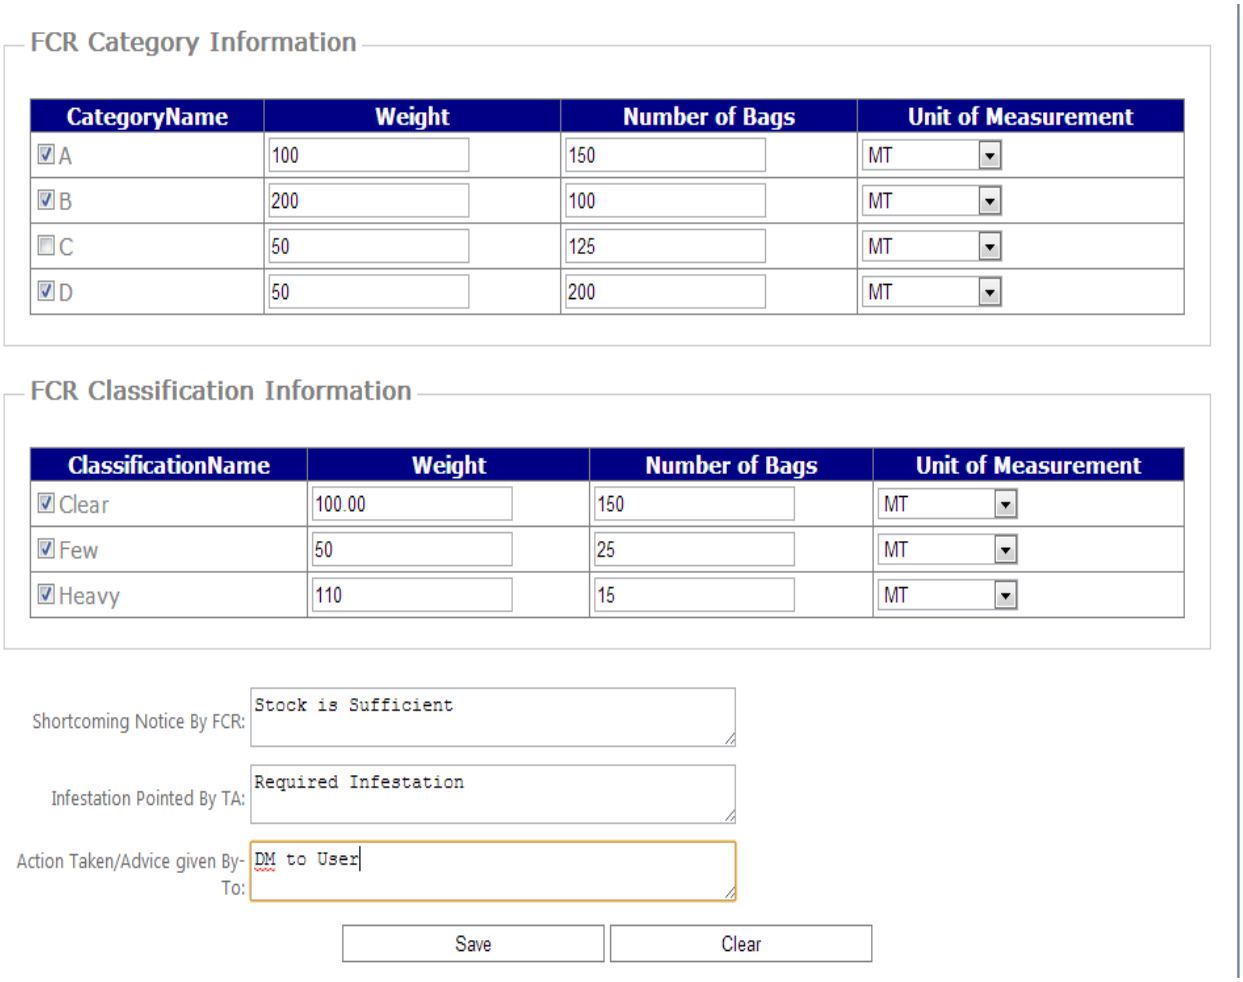
- **FCR Input**
- **FCR Category Information**
- **FCR Classification Information**
- **Remarks**



FCR Input

Label	Brief Description and validation or check, if any.
Health Check Period	This is the period in during which the user inserts the information regarding the complex name, godown plinth, commodity etc. but the user cannot edit it, as it comes dynamically in the textbox.
District	This field will come dynamically from the backend as the user has login with the same district as shown in this textbox.
Warehouse	This field will also come dynamically from the backend.
Complex Name	It shows various complexes which comes under the particular warehouse which also comes dynamically under a particular warehouse.
Godown Plinth Name/No.	It also comes dynamically under a complex and a user has to select the godown from the list.
Commodity	This shows the list of various commodities like wheat, barley, maize, cotton, black gram etc. and the user has to select 1 according to the requirement.
Unit Of Measurement	Various measurement units are CC, Kg, Tones, MT and the user has to select 1 from them.

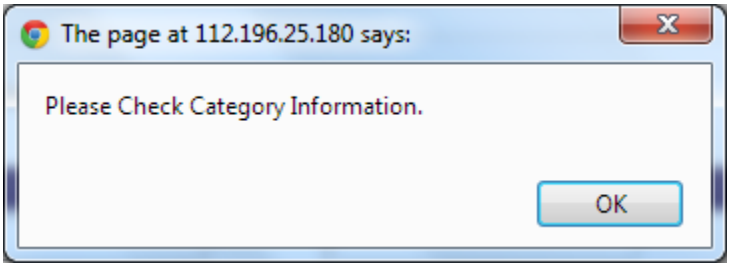
Agency	After selecting units the user has to select agency which comes dynamically like FCI, F&S, IFFCO etc.
Year Of Storage	It contains the list of years and the user has to select a year from the list.
Crop Year	It contains the list of years and the user has to select a crop year from the list.
Select Stock	It contains the 2 options of stock which comes after selecting crop year that are Covered, Open and the user has to select 1 from them.
No Stock	This is the checkbox that means the user has to select it or deselect it. On selecting the checkbox the user will be unable to edit or insert into the "**FCR category Information**", "**FCR Classification Information**".



FCR Category Information

Label	Brief Description and validation or check, if any of.
Category Name	This describes the quality of product that means “A” comes under high quality, “B” under lower quality than “A”, “C” lower than “B” and “D” lowest quality.
Weight	It weight of the product and the user has to fill with numeric value only.
Number of Bags	It is the total count of the bags in which the product is stored and user has to fill with numeric value only.
Unit of Measurement	Various measurement units are CC, Kg, Tones, MT and the user has to select 1 from them.

The category has a checkbox ahead which is shown above in the image and the user has to select it, if he wants to save the value. The checkbox if unselected but contains the information will no longer to be save in the database. If none a category from A, B, C, D is selected then on saving the data, it will display the message to select one from the various options as shown below:-

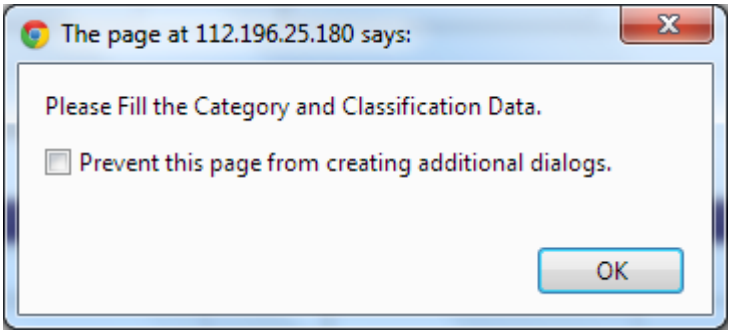


FCR Classification Information

Label	Brief Description and validation or check, if any of.
Classification Name	It contains the information regarding the impurity in the storage. It contains the 3 category names which are “Clear” describes that the stock has pure i.e. having zero impurity, “Few” describes that the storage has small amount of impurity; “Heavy” describes the large amount of impurity.
Weight	It weight of the impurity lies in stock and the user has to fill with numeric value only.

Number of Bags	It is the total count of the bags in which the product is stored and user has to fill with numeric value only.
Unit of Measurement	Various measurement units are CC, Kg, Tones, MT and the user has to select 1 from them.

The classification has a checkbox ahead which is shown above in the image and the user has to select it, if he wants to save the value. The checkbox if unselected but contains the information will no longer to be save in the database. If none a category from Clear, Few, Heavy is selected then on saving the data, it will display the message to select one from the various options as shown below:-



The page at 112.196.25.180 says:
Please Fill the Category and Classification Data.
Prevent this page from creating additional dialogs.
OK

Remarks

The user has to fill the remarks in the textbox which contains the information of:-

- Shortcoming notice by FCR
- Infestation provided by TA
- Action taken/ Advice given by.

Save button

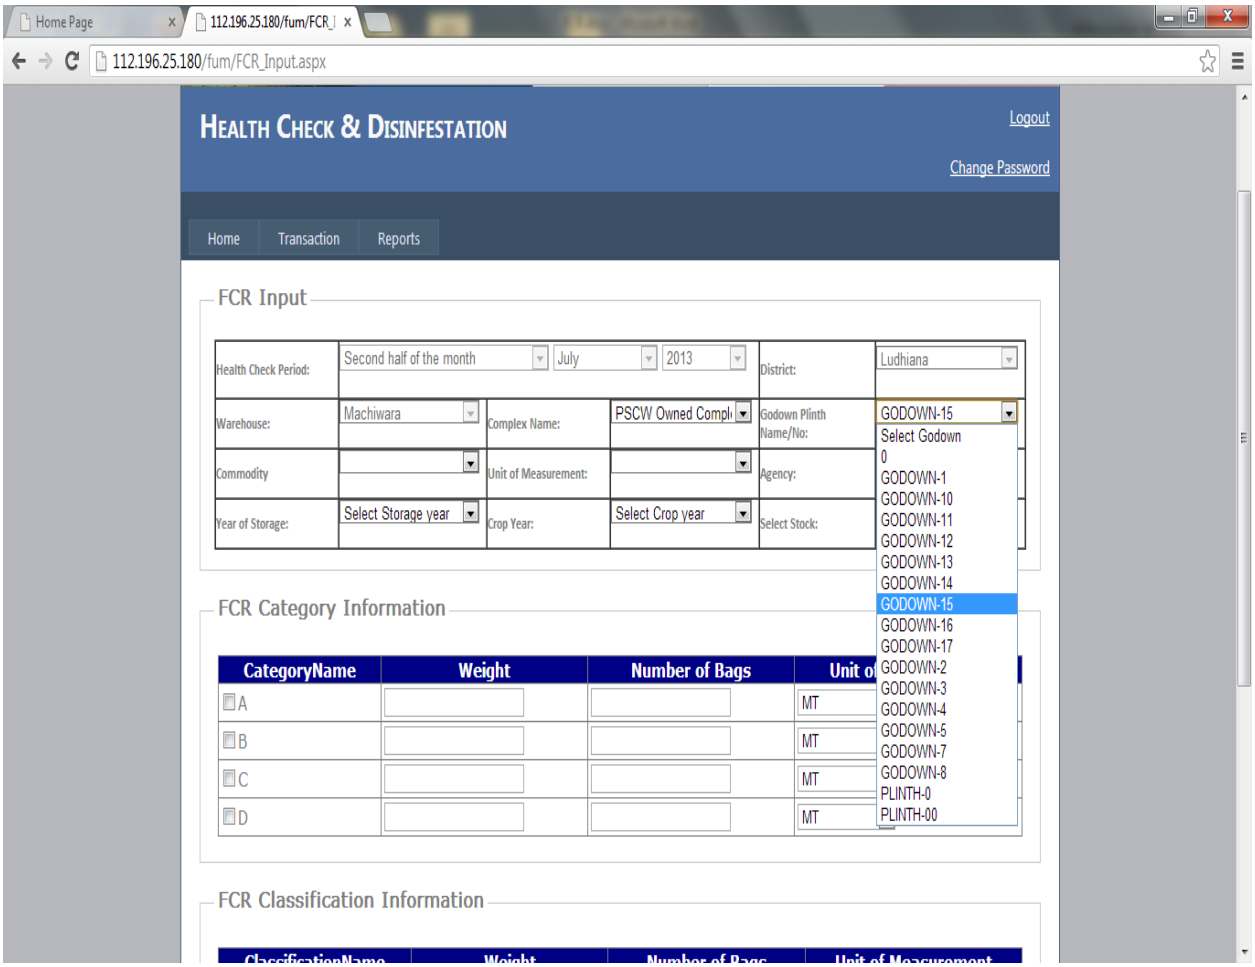
After filling all the necessary information the user can save the data by clicking on the save button.

Clear button

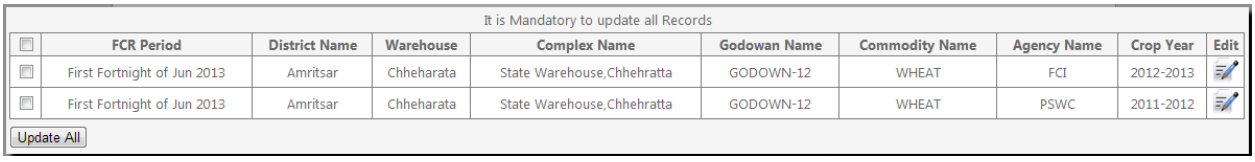
If the user is not satisfies by the information he filled in the whole page then he can clear all the data by clicking on the clear button.

Some important Information

The data of the FCR Input comes dynamically as described above, on selecting the district then warehouse then complex name and then godown plinth name, if the godown plinth already contains the information then a dialog box will appear on the screen.



This is the dialog box which appears after selecting the godown plinth, it contains the information already inserted in it, if the user wants to edit the data then he has to select the row by selecting the checkbox attach ahead of every row and after selecting it he needs to click on the edit image at the end of a particular row.



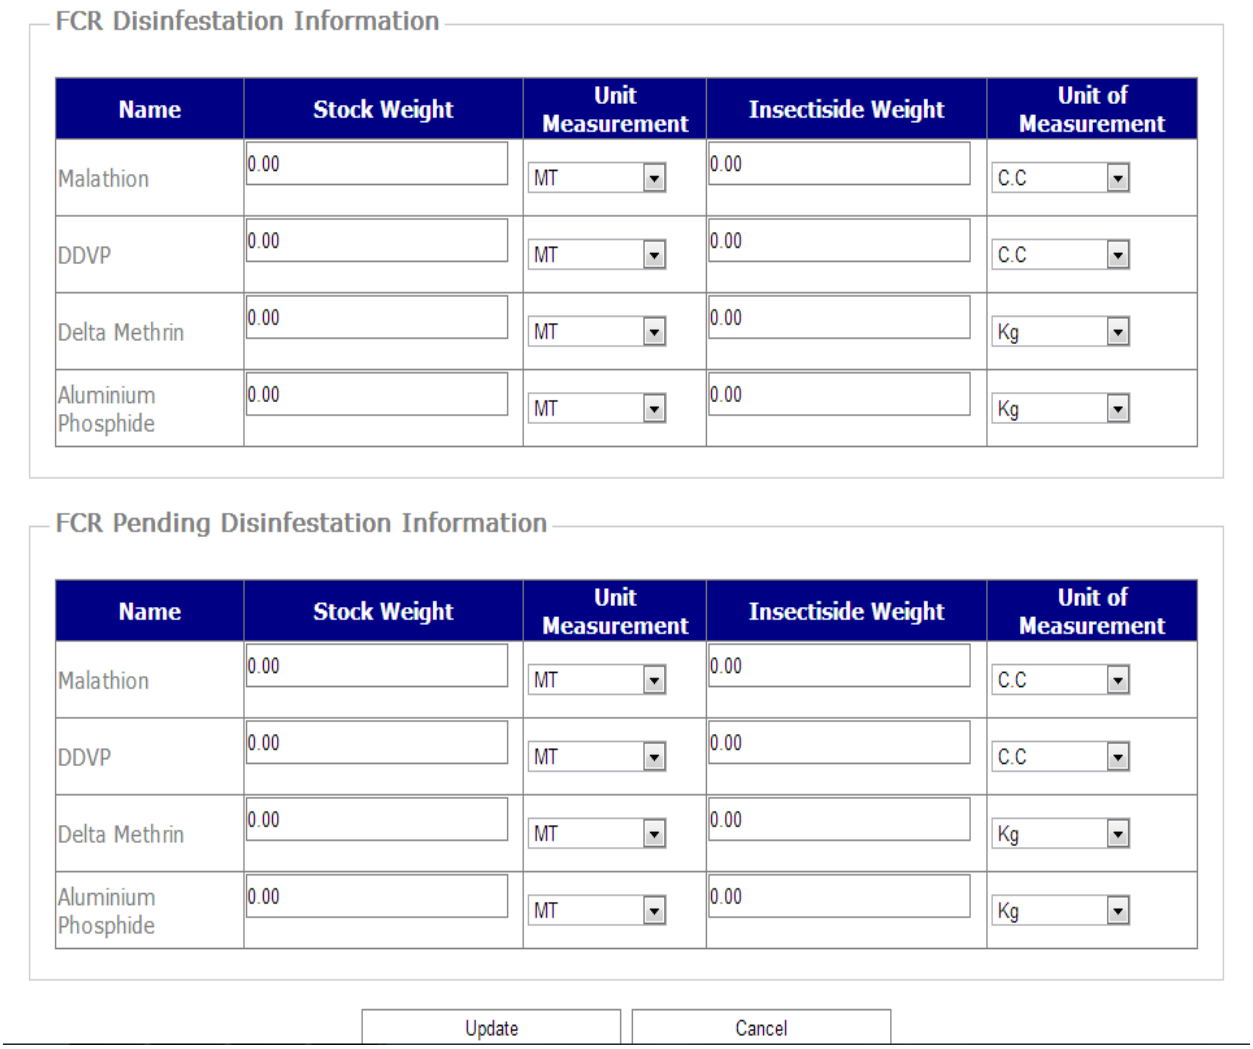
FCR Disinfestations Information

After selecting edit image as described above, the data which the godown contains will be displayed in the following fields.

FCR Disinfestations contains the information regarding the insecticides used to protect the stock in the godowns from the insects.

FCR Pending Disinfestations Information

It contains the information regarding the insecticides which are left in the stock and has to be mentioned in the record.

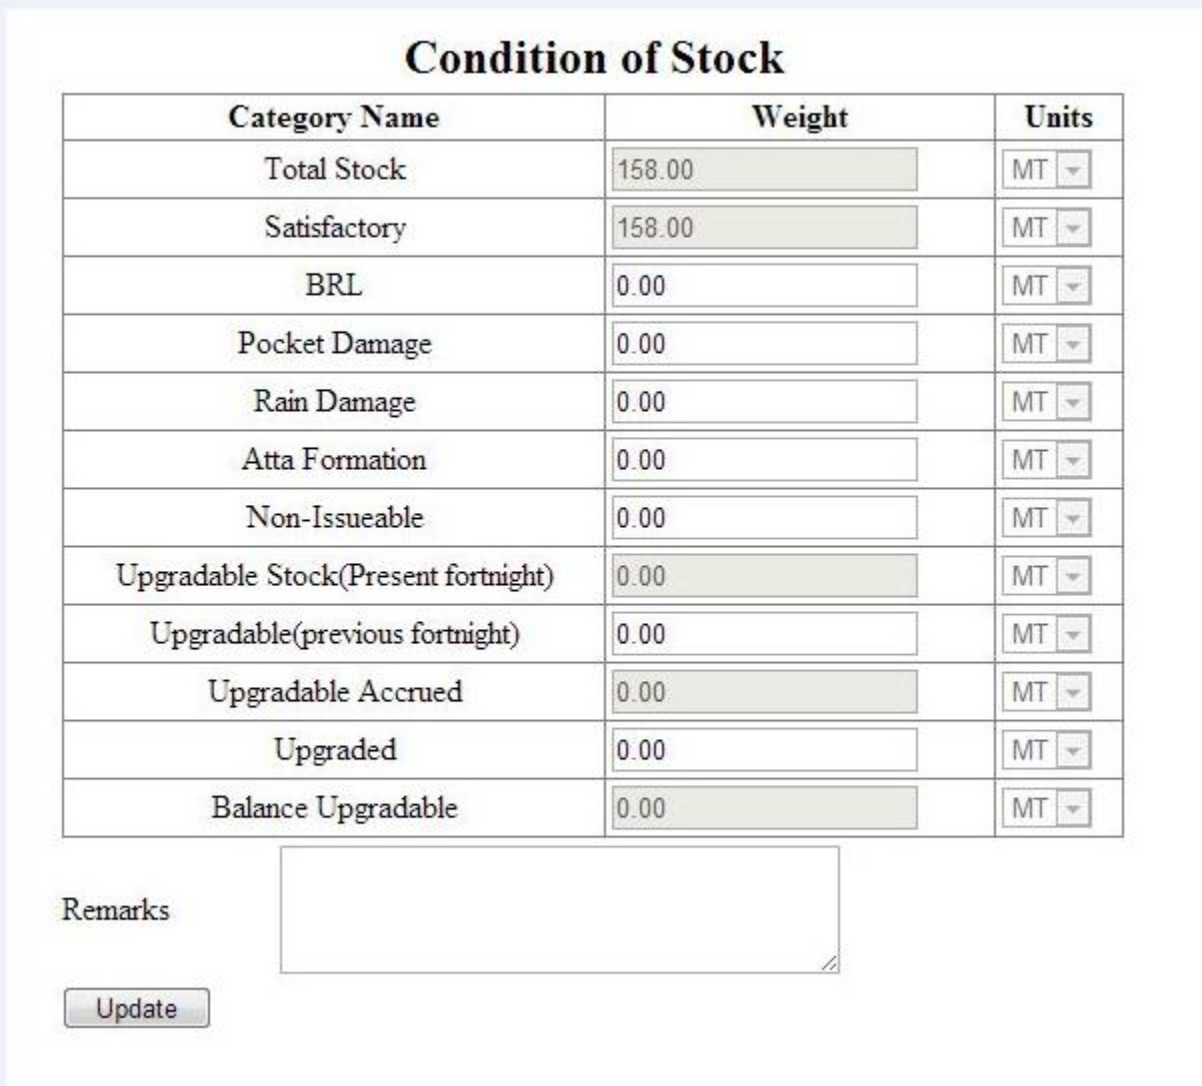


FCR Disinfestations Information labels & FCR Pending Disinfestations Information label

Label	**Brief Description and validation or check, if any of.**
Name	It contains names of the insecticides which we use in the godowns to protect the stock like Malathion, DDVP, Delta Methin etc.
Stock Weight	It weight of the stock which is there in the godown and the user has to fill with numeric value only.
Unit of Measurement	Various measurement units are CC, Kg, Tones, MT and the user has to select 1 from them.
Insecticide Weight	It is the weight of the insecticide.
Unit of Measurement	Various measurement units are CC, Kg, Tones, MT and the user has to select 1 from them.

Update button

After clicking on "**Update Button**" following screen will appear:



Condition of Stock

Category Name	Weight	Units
Total Stock	158.00	MT
Satisfactory	158.00	MT
BRL	0.00	MT
Pocket Damage	0.00	MT
Rain Damage	0.00	MT
Atta Formation	0.00	MT
Non-Issueable	0.00	MT
Upgradable Stock(Present fortnight)	0.00	MT
Upgradable(previous fortnight)	0.00	MT
Upgradable Accrued	0.00	MT
Upgraded	0.00	MT
Balance Upgradable	0.00	MT

Remarks

Update

New screen of upgradable condition of stock will have the following fields:

- Total Stock _____ It will be the total stock of categories(A+B+C+D)
- Satisfactory_____(Read only [total stock-balance Upgradable- Non Issuable])
- Aatta Formation_____ User will enter the value of the atta formation weight here
- Pocket Damage_____[Enter Pocket damage Weight]
- Rain Damage_____[Enter Rain Damage Weight here]
- BRL _____[Enter BRL Weight here]
